

Operational Advisory and Support: Customer Overview

TIER CaseFlow - ongoing premium support (as listed on www.tiercaseflow.com)

Thank you for your interest in **TIER CaseFlow**. This document summarizes **Operational Advisory and Support** (also referenced as **Premium Support** on the website). It is an ongoing service layer for organizations that want structured oversight and assistance beyond self-service software use.

Pricing model: Operational Advisory and Support is **quote-based only**. There is **no fixed public monthly price**; after scoping, you receive a **written quote** at the agreed recurring amount (for example, a Stripe Quote you accept online) before monthly auto-billing begins.

Relationship to Access Only and billing

Access Only is the self-service subscription: case tracking, activity logging, voucher tracking, and basic reporting for a stated monthly rate on the website.

Operational Advisory and Support includes **everything in Access Only** plus the hands-on advisory and support described in this document. **Your advisory fees include monthly CaseFlow subscription access.** You are **not** billed for a separate Access Only subscription on top of advisory support for the same coverage period.

If you later **discontinue advisory support** but wish to **continue using the application**, you may move to the **Access Only** package for ongoing subscription-only access, subject to the checkout or invoicing process in effect at that time.

What the service is intended to cover

Per public marketing copy, the program is designed to help manage workflow, monitor case progress, and reduce gaps where matters or revenue-related follow-up could be missed. It is positioned for teams that want ongoing structure and support as caseload grows.

Illustrative focus areas published on the pricing page include:

- **Full case management** support (within the scope agreed in your statement of work or order).
- **Weekly reports** aligned to your practice and attorney communication needs.
- **Voucher monitoring** to support billing hygiene and follow-through.
- **Back-office support** for operational tasks agreed under your engagement.

Exact deliverables, cadence, and boundaries are set in your **quote and written agreement**; this overview is not a contract.

How to engage

1. **Confirm how you will access CaseFlow.** If you are selecting **Operational Advisory and Support**, your **monthly subscription is included** in that arrangement; do not also subscribe separately to Access Only for the same period. If you are already on Access Only and are upgrading, your quote will reflect transition to the bundled model so you are not double-charged.
2. **Request a quote.** On www.tiercaseflow.com, open **Pricing**, select the **Operational Advisory & Support** column, and use **Request Pro Quote**. That form begins the scoping conversation.
3. **Review terms and pricing.** You will receive pricing and service parameters appropriate to your volume, risk profile, and desired touchpoints.
4. **Execute and onboard the advisory relationship.** Work proceeds according to the agreed start date, contacts, and reporting rhythm.

Request Pro Quote (Google Form): open form in browser

Note: White-Glove Onboarding (optional, separate on the website) is a scoped migration and setup project with its own fee. **Operational Advisory and Support** is ongoing and **includes** subscription access as described above. **Access Only** remains available for clients who want software access without advisory support. Combinations and timing are subject to your written agreement.

Client responsibilities

Your organization remains responsible for case decisions, legal strategy, client communications as required by your rules of professional conduct, and accuracy of data entered in CaseFlow. Advisory and support services complement your operations; they do not replace licensed professional judgment.

Support and inquiries
