

White-Glove Onboarding: Customer Overview

TIER CaseFlow - optional implementation services

Thank you for your interest in **TIER CaseFlow**. This document describes **white-glove onboarding**, an optional professional services engagement to migrate existing case information and establish a structured starting point within the platform. It is intended for organizations that prefer assisted setup rather than configuring the application entirely on their own.

Scope: subscription versus onboarding

Ongoing **application access** is provided through your subscription arrangement. **Access Only** is subscription-only. **Operational Advisory and Support includes** that same application access within the advisory fees; you do not pay Access Only and advisory support separately for the same subscription period.

White-glove onboarding is separate from both: a **scoped, one-time project** focused on data migration, organization, and workflow alignment so your team begins with a clear structure rather than an empty workspace.

Onboarding fees are **quoted individually** based on matter volume, source data format (for example, spreadsheets versus exports or email-based records), and the level of assistance required. Many engagements fall approximately in the **\$250-\$750** range; you will receive a **written quote** for your specific requirements prior to any onboarding invoice.

Engagement process

1. **Maintain active CaseFlow access.** Most clients use the **Access Only** plan on www.tiercaseflow.com for subscription-only access. If you are on **Operational Advisory and Support**, your **monthly subscription is included** in that program; you should not carry a separate Access Only subscription for the same period. Implementation work is coordinated once platform access is in place.
2. **Submit an onboarding request.** From the website, open **Pricing**, locate **White-Glove Onboarding**, and select **Request Onboarding Quote**. The linked form collects the information needed to prepare your quote (including volume, data sources, and objectives).
3. **Review and approve the quote.** You will receive scope, pricing, and a list of materials or access required. The onboarding fee is invoiced only after you approve the quoted work.
4. **Remit onboarding payment.** Migration and setup work begins **after** onboarding fees are paid, consistent with the process described on the website. Onboarding charges are distinct from recurring subscription charges.

Note: White-glove onboarding is not required to use CaseFlow. Organizations may subscribe and configure the system through self-service. This overview applies only to clients who elect assisted onboarding.

Information that supports accurate scoping

- Approximate count of active matters and how they are tracked today.
- Whether structured exports (for example, CSV or Excel) are available, or whether matter data resides primarily in email or unstructured sources.
- A designated primary contact for implementation questions.
- Material dates or obligations (for example, trial or reporting windows) that should be considered when scheduling migration work.

Client responsibilities after go-live

Following migration, your organization remains responsible for maintaining **user profile settings** (including full name, agency, contact email for attorney replies, and reply-routing preferences), validating case data, and operating day-to-day features such as the **Communication Hub** and **Report Hub**. Onboarding establishes structure; ongoing case management remains with your team.

For product support or to arrange a guided walk-through, contact **support@tiercaseflow.com** or use the **Schedule Demo** option on www.tiercaseflow.com.
